

EHC-SWR

Septic System Additive
The Safe & Natural Way to Reduce Sludge & Waste

Septic Systems

EHC-SWR is a specially blended formula which is designed to improve and maintain septic tank and cesspool performance. Once scoop of this formula contains approximately 300 billion environmentally friendly microbes.

Benefits:

- Concentrated formulation for better results.
- Easy to use! Just flush into drain or toilet once a month.
- Out performs weaker “store-bought” products.
- Helps keep entire system clear and free-flowing.
- Prevents costly field or septic repairs due to build up.
- Helps eliminate unwanted odors and back-ups...permanently!
- Completely safe for people or pets. No chemicals or caustics.
- High enzyme producing formula

Directions for normally operating systems

- Use two scoops every month.
- To apply in toilets, simply drop the product in the toilet bowl and flush.
- For application in drain, mix with one quart of cool or lukewarm water until fully dissolved and pour down desired drain.
- For best results, apply just before bedtime.
- Record date and repeat this procedure monthly.
